

OPTIPHI PEEL

Recovery from treatment is: None

Risks and Complications: Low to medium

Anesthetic: None

Procedure duration: 45 minutes

Specialist: Dr. Zak

Back to work: Same day

Why the Optiphi peel?

The Optiphi peel is a great way to experience real skin rejuvenation and results without the harsh side effects that are typically associated with peels. There is little to no down time after the treatment and very limited redness, swelling, and peelings. This peel works by combining regenerative capabilities of glycolic acid in combination with a range of potent actives. This provides intense hydration and anti-ageing benefits with resurfaced and regenerated skin.
